Workshop: Application of programme guidelines for community-driven projects to eliminate TB among migrants

Thursday, December 3, 2015
9am - 12pm
Room MR 2.6

This workshop provides a review of the migrant-specific programme development considerations created as the result of facilitated group discussions during the migration workshop in Barcelona, 2014. Four field examples of migrant initiatives with successful strategies for screening, assuring access to healthcare, finding undiagnosed cases, providing continuity of care and understanding the burden of TB in migrant communities world-wide will be presented. A brief introduction on addressing migrant-specific programmes in funding requests is also included.

PRESENTATIONS

1. Brief review of the document outlining the factors affecting the development of migrant-specific TB programmes
Gilles Cesari (Switzerland)
2. Field Presentations
 - TB screening for authorised and unauthorised migrants
 - Providing global continuity of care for migrant TB patients
 - Finding the undiagnosed cases in migrant communities
 - Understanding the burden of TB within migrant populations
3. Discussion of the inclusion of migrant programmes in funding proposals
Deliana Garcia (USA)
