Accelerating TB Care in High Burden Countries

University Research Co., LLC will be offering a series of one-hour webinars as part of the global USAID TB CARE II program. The USAID TB CARE II program is a cooperative agreement led and implemented by URC through the support of a wide consortium of health and development organizations. The project complements and builds upon existing and planned projects in the Bureau for Global Health and has provided global leadership and support to national TB programs and other in-country partners since 2010.

Webinars will cover topics of infection prevention and control (IPC), providing comprehensive supportive care for people with DR-TB, improving community-based DR-TB care, and digital technology interventions for TB and DR-TB. Webinars will engage NTP leaders, researchers, civil society actors, and other key people working on TB in all 24 USAID high-priority TB countries. To find out more about the upcoming webinars being offered, register through this link: http://tb.academy/my-account/.

Their first webinar on **Improving the quality of DR-TB Care: A DR-TB Care Package Overview**, was held on **Monday, July 22, 2019, at 9:00-10:00 ET (14:00-15:00 GMT).** A recording of the first webinar and presentation can be found here: http://tb.academy/archived-webinars/.
