

3rd Global Symposium on **IGRAs 2012** January 12-15, 2012

Hilton Waikoloa Village
Waikoloa, Hawaii

Call for Abstracts

Abstract Submission Deadline: September 1, 2011

Abstracts submitted after the deadline will only be eligible for poster presentation

Selected Program Topics

- Understanding the Pathogenesis of TB
- The new understanding of the dynamics of TB infection
- What IGRAs have allowed us to understand about TB
- What does the experience with immune modifiers tell us about the mechanism and risk of progression of TB disease
- The identification of persons who are likely to progress to active TB

Practical Issues

- Use of IGRAs in the face of immunosuppression
- Use of IGRAs in the face of HIV
- Use of IGRAs in the face of immune modifiers
- IGRA testing of HCW
- Interpretation of IGRA results

Public Health Issues

- Outbreak studies, contact tracing, student settings
- The use of IGRAs in pediatrics
- Role of IGRAs in the eradication of TB
- Global applications
- Eliminating TB by 2050
- A new treatment of LTBI

This activity has been approved for *AMA PRA Category 1 Credit™*.
