

Supplier: BD International

Subject: Supply delays for BD MGIT Instruments, reagents and consumables

Context: Since late 2021, BD has faced supply chain challenges due to the COVID-19 pandemic and shortages of critical raw materials resulting in supply delays for the BD MGIT instruments, reagents and consumables. BD has since increased its production capacity and cleared the majority of the standing orders. However, additional time is required until BD clears the backlog of delayed orders.

Extent of supply delays: Delays on some products (not specified by BD).

Expected duration of supply delays: Through end of 2022. GDF will update this notice when new information about duration of the supply delay is available.

GDF Mitigation Actions: GDF is working with clients to split orders into multiple, smaller shipments to address immediate client needs.

Contact Information: For additional or more detailed information about any impacted product; or, if you need support with order planning, please contact the GDF Country Supply Officer for your programme or gdf@stoptb.org
