# GLOBAL DRUG FACILITY MEDICINES CATALOG January 2025

As a unit of the Stop TB Partnership, GDF provides a range of quality-assured medicines and medical supplies to treat all forms of TB in adults, adolescents and children. This catalog is categorized by products used to treat adults and adolescents as well as children. Each section is subdivided into single medicines and fixed-dose combinations, in alphabetical order by the description.

Each product is marked for its intended use, as recommended by WHO, i.e. to treat drug-susceptible TB, drug-resistant TB and/or for TB preventive treatments.

To place an order for any medicine or medical supply, please follow the step-by-step guide available on the GDF website. All prices in this catalogue are listed as ex-works (EXW) prices.

# DIAGNOSTICS FOR Mtb INFECTION

## SIILTIBCY skin test for detecting Mycobacterium tuberculosis (Mtb) infection.

The SIILTIBCY skin test is a new diagnostic tool for detecting Mycobacterium tuberculosis (Mtb) infection, using Mtb-specific antigens (recombinant proteins of ESAT-6 and CFP-10). It offers enhanced specificity over the traditional tuberculin skin test (also known as the Mantoux test), particularly in BCG-vaccinated individuals.

To be stored between +2–+8°C, in the original packaging, protect from light, do not freeze.

To be ordered in multiples of 120 Vials (1,200 doses/tests) due to specific shipping requirements.
