

Supplier: Molbio Diagnostics Limited

Subject: Update: Temporary Supply delays of the Truenat MTB Plus Kit resolved

Update: 29 September 2025: Molbio Diagnostics Limited has informed GDF that the production and delivery timelines for the Truenat MTB Plus test kit have returned to normal. This is a result of the successful implementation of the production improvements for a critical component of the Trueprep AUTO v2 Sample Prep Kit, which is included in the Truenat MTB Plus kit.

All outstanding orders have now been fulfilled. New orders are being processed without delay.

Cause of supply delay: The Truenat MTB Plus test kit's availability is currently experiencing temporary delays. This is due to the time required to implement production improvements for a critical component of the Trueprep AUTO v2 Sample Prep Kit, which is part of the Truenat MTB Plus kit.

As a result, some orders will experience delays. However, the supplier is actively increasing production capacity of the Truenat MTB Plus test kit to expedite fulfillment of all backlog orders.

Extend of supply delay: Supply delays are expected to continue until September 2025. GDF will provide updates as soon as new information becomes available regarding the duration and resolution of the delay.

GDF Mitigation Actions:

- GDF is working closely with the supplier to identify affected orders and will prioritize urgent shipments as soon as products become available
- GDF remains in regular contact with the supplier to receive ongoing updates on order status and anticipated timelines for resumption of supply.
- Clients will be notified as soon as the product becomes available, to minimize disruption to programmatic activities.

Contact Information: For additional information, or if you need support with order planning, please contact either the GDF Country Supply Officer for your programme or gdf@stoptb.org
