

Fitting Instructions for Three-Panel Filtering Facepiece Respirator

Issue Date 01/01/04

Wearing your three-panel filtering facepiece respirator

1

Remove the respirator from its packaging and hold with straps facing upward. Place the bottom strap under the center flaps next to the “WARNING” statement.

2

Fully open the top and bottom panels, bending the nosepiece around your thumb at center of the foam. Straps should separate when panels are opened. Make certain the bottom panel is unfolded and completely opened.

3

Place the respirator on your face so that the foam rests on your nose and the bottom panel is securely under your chin.

4

Pull the top strap over your head and position it high on the back of the head. Then, pull the bottom strap over your head and position it around your neck and below your ears.

Non-valved, three-panel filtering facepiece respirator

Valved, three-panel filtering facepiece respirator

5

Adjust for a comfortable fit by pulling the top panel toward the bridge of your nose and positioning the bottom panel under your chin.

6

Place fingertips from both hands at the top of your nose and mold the nosepiece around your nose to achieve a secure seal. **Note:** Pinching the nosepiece using one hand may result in improper fit and less effective respirator performance. Use two hands.

Check the seal of your three-panel facepiece respirator each time you don the respirator.

1a For non-valved respirators Place one or both hands completely over the middle panel. *Inhale and exhale sharply.* If air leaks around your nose, readjust the nosepiece. If air leaks between the face and facesal of the respirator, reposition it by adjusting the panels and straps. If you cannot achieve a proper seal, **do not** enter the contaminated area. See your supervisor.

1b For valved respirators Place one or both hands completely over the middle panel and *inhale* sharply. If air leaks around your nose, readjust the nosepiece. If air leaks between the face and facesal of the respirator, reposition it by adjusting the panels and straps. If you cannot achieve a proper seal, **do not** enter the contaminated area. See your supervisor.

Important

Before using these respirators, you must determine the following:

1. The type of contaminant(s) for which the respirator is being selected.
2. The concentration level of contaminant(s).
3. Whether the respirator can be properly fitted on the wearer's face.
Do not use with beards, on other facial hair, or other conditions that prevent a good seal between the face and the facesal of the respirator.
4. Before use of these respirators, a written respiratory protection program must be implemented, meeting all the requirements of OSHA 29 CFR 1910.134, including training, medical evaluation and fit testing.
